HITHESH HG

DATA ANALYST & BUSINESS INTELLIGENCE SPECIALIST

Bengaluru, India | hitheshhg@gmail.com | hitheshhg.vercel.app | github.com/hitheshhg | linkedin.com/in/hitheshhg

EXECUTIVE SUMMARY

Results-driven Data Analyst with a rigorous Computer Science foundation, specializing in translating complex relational datasets into actionable business intelligence, predictive classification models, and executive dashboards. Expert in advanced SQL (CTEs, Window Functions), Python (Pandas, Scikit-learn), Power BI (DAX, Star Schema), and statistical experimentation.

TECHNICAL COMPETENCIES

* **Querying & Relational Databases:** Advanced SQL (PostgreSQL, MySQL, Google BigQuery, Snowflake), CTEs, Window Functions
* **Programming & Data Science:** Python (Pandas, NumPy, Scikit-learn, Statsmodels, SciPy), R, Jupyter Notebooks, Git / GitHub
* **BI, Visualization & Reporting:** Power BI (DAX, Power Query, Data Modeling), Tableau Desktop/Server, Looker Studio, Advanced Excel
* **Analytics & Statistical Modeling:** Exploratory Data Analysis (EDA), Cohort Analysis, RFM Segmentation, A/B Hypothesis Testing, ETL Pipe

PROFESSIONAL EXPERIENCE

Data & Business Intelligence Analytics Trainee — 06/2026 - 08/2026

Dlithe | Bengaluru, India

> Extracted, cleansed, and analyzed 100k+ row enterprise transactional datasets using PostgreSQL window functions and CTEs.
> Engineered interactive multi-page Power BI & Tableau dashboards with complex DAX measures and row-level security (RLS).
> Conducted exploratory data analysis (EDA) and feature engineering in Python (Pandas, NumPy) to pinpoint customer churn drivers.
> Formulated hypothesis tests (Chi-Square, T-tests) and regression models to deliver data-backed insights for executive decisions.
> Automated weekly reporting pipelines via Python scripts, eliminating 8+ hours of manual spreadsheet compilation per cycle.

Junior Data Analyst Intern — 2023

2StarIT Solutions | Karnataka, India

> Analyzed web and mobile user engagement telemetry to identify conversion drop-offs across multi-step product funnels.
> Designed and automated executive KPI dashboards in Google Looker Studio and Excel for 10+ business stakeholders.
> Wrote structured SQL queries reconciling transactional payments with CRM records, resolving revenue reporting discrepancies.
> Assisted product team in evaluating A/B test parameters and verifying statistical significance on feature rollouts.

FEATURED ANALYTICS PROJECTS

Customer Churn & Retention Intelligence (Python, PostgreSQL, Power BI, XGBoost)

> Constructed predictive attrition model on 70,000+ subscription accounts achieving 0.88 ROC-AUC and 86% recall.
> Deployed an executive Power BI dashboard with what-if parameter modeling; contributed to 18% churn reduction and $280K ARR saved.

E-Commerce Cohort & Revenue Analytics (SQL Window Functions, Tableau, RFM Analysis)

> Analyzed 500k+ transactions using PostgreSQL window functions (DENSE_RANK, LAG) to construct dynamic cohort retention heatmaps.
> Developed RFM customer segmentation in Python, driving 24% repeat purchase lift and automating 15 hrs/week of reporting.

Clinical Readmission & Risk Stratification (Python, Statsmodels, Looker Studio, BigQuery)

> Evaluated 100k+ hospital admissions using multivariate logistic regression and odds ratio estimation to identify readmission risk factors.
> Delivered Looker Studio scorecard identifying 4 key clinical drivers ($p < 0.01$) with projected $350K penalty reduction.

EDUCATION & ACADEMIC BACKGROUND

Bachelor of Technology (B.Tech) - Computer Science & Engineering — 2023 - Present

NMAM Institute of Technology (NMAMIT), Nitte | CGPA: 8.7 / 10.0

Relevant Coursework: Database Management Systems, Probability & Statistics, Data Mining & Business Analytics, Operating Systems
