EDUCATION

BTech, Computer Science and Engineering, NMAMIT

July 2023 - Present

CGPA: 7.34/10.00 — Course works: Object Oriented Programming, Database, Operating System, Networking

Pre-University Education - PCMBs, SAI PU College

February 2022 - February 2023

Aggregate: 86.6/100 — Karnataka State Board

PROFESSIONAL EXPERIENCE

Machine Learning Industrial Trainee

February 2025 - March 2025

Eduxlabs

Karkala,India [Remote]

Gained hands-on Machine Learning experience with Python, working on Kaggle and real-world datasets using NumPy, Pandas, Scikit-learn, and Matplotlib for data analysis and modeling.

Web Developer Intern

September 2023 - October 2023

2Star IT Solutions

Karkala,India [On-site]

Built responsive web interfaces using Svelte, Tailwind CSS, JavaScript, and Bootstrap, enhancing UI/UX and performance. Gained back-end experience with Node.js, Express, EJS, PostgreSQL, Supabase and Postman.

PROJECTS

Portfolio Website — React, Tailwind CSS, Supabase, Three.js, Vercel — [\(Source Code\)](#)

A responsive and interactive personal portfolio website built to showcase projects, skills, and experience. Features dynamic content management using Supabase, modern utility-first styling with Tailwind CSS, and immersive 3D visual elements powered by Three.js. Designed for performance, responsiveness, and smooth user experience, with seamless deployment on Vercel.

Medivoice — React, Tailwind CSS, Node.js, Express, PostgreSQL, Neon, Render, Vercel — [\(Source Code\)](#)

A full-stack healthcare platform enabling voice-based patient–doctor communication. Built a scalable Node.js + Express backend with PostgreSQL (Neon) and a responsive React frontend, deployed on Render and Vercel. Implemented speech-to-text processing, structured medical data handling, and multi-user access to improve accessibility and streamline interactions.

TinyML — ESP32, MAX9814 Microphones, TinyML, Embedded C/C++, Edge AI — [\(Research Project\)](#)

A real-time embedded voice classification system developed during a research internship using TinyML on an ESP32 microcontroller. Utilizes dual MAX9814 microphones to capture and classify audio events such as claps, whistles, speech, and silence directly on-device.

ADDITIONAL INFORMATION

Host & Speaker – Online Gambling & Digital Addiction Awareness Program

Led interactive awareness sessions for 100+ students at Government Polytechnic College, Karkala and Jaycees School, Karkala, focusing on the risks of online gambling, digital addiction, and responsible digital behavior. Enhanced public speaking, leadership, and community outreach skills as Secretary, NSS IT Wing.

Organizer – Innovex 2025 Hackathon (NSS IT Wing)

Contributed to the successful execution of a 24-hour national-level hackathon by supporting technical operations, assisting in problem statement design, managing participant onboarding, and resolving real-time technical issues. Strengthened teamwork, coordination, and event management skills.
